## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al (US 4606641).

Re clm 8: Yamada et al discloses a method for measuring a thickness of a thin film formed on a top surface of a substrate comprising: spectral scanning a single point on said top surface of said substrate followed by selecting a single wavelength for spatial scanning over a plurality of points of said top surface for determining a thickness profile of said thin film (Col 2- Col 4).

### ***Allowable Subject Matter***

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose or suggest said step of selecting a single wavelength is a step of selecting an optimal wavelength functionally related to a film thickness measured at said single point by said spectral scanning and the refractive index of said thin film in conjunction with the rest of the claimed subject matter.

Claims 1-7 and 10-18 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or suggest selecting an optimal wavelength within said range of wavelengths...for measuring ...at a single point..measuring reflection intensities by scanning over a plurality of points with ...said optimal wavelength in conjunction with the rest of the claimed subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grimbergen et al 6406924, Coronel et al 5658418, Demos et al 6626185, Saka et al 6476921, Sugiyama et al 6137575, Reichard 3601492, Ledger 5291269 and Mumola 5543919.
